

September Accomplishments

Lake Superior students have started their year off with great effort. The beginning of the year is procedure, procedure, procedure. We have practiced fire and tornado safety. We have studied germs, learned how to wash our hands thoroughly and have practiced the proper way to cover our mouths to prevent spreading germs. Students have worked on how to line up, get snack, and use their chair pouches. We have worked on controlling the volume of our voices at work time, snack time and whole group times. Along with all of the above procedures, students have been learning about a stories setting and retelling events of stories along with reviewing math facts and math terminology.

Thank you for taking the time to review and sign your child's agreement. Please continue to check your child's agreement each night for homework and make sure they are reading at least 15 minutes each evening. If you have any questions you may contact me at school, send in a note, or write a note on the back of your child's agreement. You may also, contact me via e-mail: kkendrick@newbedfordacademy.com

Task Card Practice in Lake Superior

I just want to take a moment to explain how the Task Card System works in my classroom for September. September is the month that students are learning about my behavioral expectations. Students have helped develop rules they expect in our room. Students have been "practicing" using the task card system and following these rules. This means that any cards pulled in September are not recorded on your child's report card. Students are working toward being the best student they can be. I am so impressed and very proud of the effort of all of my students!
